

## About Singapore

[www.visitsingapore.com](http://www.visitsingapore.com)

Singapore is a tropical, cosmopolitan city-state in South East Asia with excellent international connectivity by air, sea and land. Experience an exotic 'East meets West' blend of culture, cuisine, shopping, arts and architecture culled from the best of her people who are composed of four diverse races. Move around the island on our world class transport system which is comprehensive, efficient and affordable.

## About LTA Academy

[www.LTAacademy.gov.sg](http://www.LTAacademy.gov.sg)

The LTA Academy is set up by the Land Transport Authority (LTA), Singapore, and supported by the Ministry of Transport. It serves as a one-stop platform for sharing Singapore's knowledge and experience in land management and development; and promoting the research and exchange of global best practices in urban transport. The Academy has designed, conducted and hosted more than 200 programmes, including international conferences, for 6,000 senior officials and professionals from 80 countries around the world. It has inaugurated the World Urban Transport Leaders Summit in November 2008.

LTA Academy has forged strategic partnerships and collaborated with established overseas and local institutions, including the German Technical Cooperation (GTZ), global Transport Knowledge Partnership (gTKP), Institute for Transportation and Development Policy (ITDP), Institute of Urban Transport (India), Tsinghua University's School of Civil Engineering, China Academy of Transportation Sciences (CATS), Sino-Singapore Tianjin Eco-City (SSTEC), GIST-TUM Asia and ITS Singapore. It is part of the Singapore Public Sector Training Institutions (PSTI) Network.

# World Urban Transport Leaders Summit

Transport is among the top challenges for cities in both developed and developing worlds due to its impact on economic vibrancy, environmental sustainability and quality of life. Leaders in transport play a pivotal role in transforming cities' transport system to enhance their liveability and global competitiveness. Transforming urban transport is a highly complex issue involving multiple challenges in social, political, economic and technological dimensions and cities will benefit from sharing of global knowledge and experience. The World Urban Transport Leaders Summit (WUTLS) series was inaugurated in November 2008 to provide a high-level platform to discuss and exchange solutions, ideas and best practices in transforming urban transport. The unique premier conference attracted top policy makers and leading professionals from some 30 countries across the world.

## 2nd World Urban Transport Leaders Summit Transforming Urban Transport for Liveable and Sustainable Cities 30 June - 1 July 2010

The 2nd WUTLS builds on the success and momentum of the inaugural summit. The theme reflects the latest approach and thinking amidst the global economic downturn, and growing concerns of climate change, air quality and energy efficiency. It will feature eminent international speakers sharing their insights and latest initiatives, and discussing a wide range of policy and strategic issues from the practitioner's perspective. Plenary forums will cover

key issues such as new vision, governance, sustainable urban solutions, green and eco-friendly transport, future transport innovations, etc. The Summit will also feature a Policy Dialogue with top leaders and experts, and site visits to the latest transport initiatives in Singapore. There will be excellent opportunities to network and forge partnership among the movers and shakers in transport. The 2nd WUTLS will be held alongside the World Cities Summit 2010.

## World Cities Summit 2010

28-30 June 2010

The World Cities Summit (WCS) is a premier event that brings together practitioners and policy makers with leading experts in their field to identify innovative solutions to the most pressing challenges facing cities today. The inaugural summit in June 2008 brought together 800 senior delegates including leaders, mayors, policy makers and the civil society. To build on its success, the next Summit in 2010 will offer a strategic platform comprising a high-level summit, plenary sessions, business forums and technical workshops.

The theme for the WCS 2010 is **Liveable & Sustainable Cities for the Future**. WCS 2010 will be a three-day event focusing on leadership and governance and building liveable and sustainable communities. Through the exchange of ideas and knowledge, cities can learn from each other to create a good environment that is sustainable and forward-looking.

## Highlights of the Summit
