

OUR PROGRAMMES

LTA Academy distinguishes itself from other academic, professional and training institutions by offering high quality learning programmes for international participants who will benefit from the following:

FOCUSED & PRACTICAL

Our training programmes are well structured and highly focused, and where applicable, include site visits and professional attachments for participants to gain practical insights and real-life experience.

DOMAIN KNOWLEDGE OF TRAINERS

Our trainers are selected from the pool of domain experts and experienced senior professionals in LTA, many of whom are globally recognised experts in their field.

HOLISTIC LEARNING

LTA Academy is able to provide a total learning experience on all modes and all aspects of land transport, from policy and planning to engineering and management.

CURRENT BEST PRACTICES

Because LTA Academy is a division of LTA, we are able to keep abreast of the latest developments and incorporate them into our programmes to showcase current best practices.

CLOSE LINK WITH THE GOVERNMENT AND INDUSTRY

LTA Academy has direct links with other government agencies as well as established institutions and professional associations in the industry. This allows us to create comprehensive training programmes with wide coverage of topics and perspectives.

CUSTOMISED PROGRAMMES

Apart from offering scheduled open programmes, LTA Academy will customise programmes to meet the specific needs and challenges of overseas governments and organisations.
